

Get smart with Gas to Power

Liquid Gas power
generators

GENERATOR SPECIALISTS

Liquid Gas power generators - cleaner and cheaper

If you're currently using diesel power generators, you could benefit from immediate cost and emissions savings with Liquid Gas power generators which have a lower carbon footprint and enhanced green credentials*.

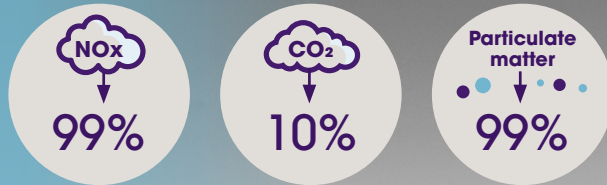

Liquid Gas is an available, reliable and proven option for power generation. Flogas are working with DTGen to deliver Liquid Gas power generation solutions for businesses like yours.

* WLPGA

Liquid Gas emits less NOx, SOx, CO₂e and PM than diesel making Liquid Gas generators the ideal solution for emission-sensitive sites*

Liquid Gas power generators offer significant reductions vs. diesel, with savings up to:

The benefits of Liquid Gas for power generation vs. diesel

As well as reducing your carbon emissions by switching from oil to gas, you can also offset your gas carbon emissions

Cost savings

Liquid Gas offers immediate cost savings with the imminent end to the red diesel tax subsidy

Reduced environmental impact

Liquid Gas has lower CO₂e, PM, NO_x and SO_x

Increased productivity

Liquid Gas is stored directly on site and feeds the generator with constant and consistent power which increases up-time

Reliable and consistent

Liquid Gas offers reliability regardless of weather conditions, meaning you're not at risk of power loss due to electrical outage or emergencies

Safe from theft

Liquid Gas has no risks of spilling, is safe to use and store and cannot be stolen

Quieter

Generators powered by Liquid Gas are quieter, and there is no requirement for the Ad-Blue needed to reduce NO_x emissions

Complete solutions

A temporary or permanent power generation solution which includes a power generator and Liquid Gas supply available nationwide
